SQS Software Quality Systems is a consultancy company founded in Cologne, Germany in 1982. The company describes itself as the largest independent provider of software testing and quality managed services, with over 4,600 employees worldwide. All services form part of a consultancy concept that covers the entire software cycle.

Background Information: Continued growth and several major acquisitions, combined with an ageing legacy HR system, resulted in SQS desperately needing a new and comprehensive HR system – one which could harmonize and integrate their current HR processes, and enable a high degree of ‘self-services’. They chose the recognized market leaders for both software, SAP SuccessFactors, and for implementations, Gavdi, using Gavdi’s award-winning ‘Best Practice’ rapid deployment solution.

Delivery

- Implementation and deployment of SAP SuccessFactors HCM suite in a phased approach

Why Gavdi?

- Unparalleled track record
- Global expertise
- Industry experience

Benefits

- Improved business performance
- Greater employee visibility
- Reporting attributes

Project Time

Started: May 2017

Live: July 2017

Modules

Employee Central

Result

Employee Central go-live in 2 months!

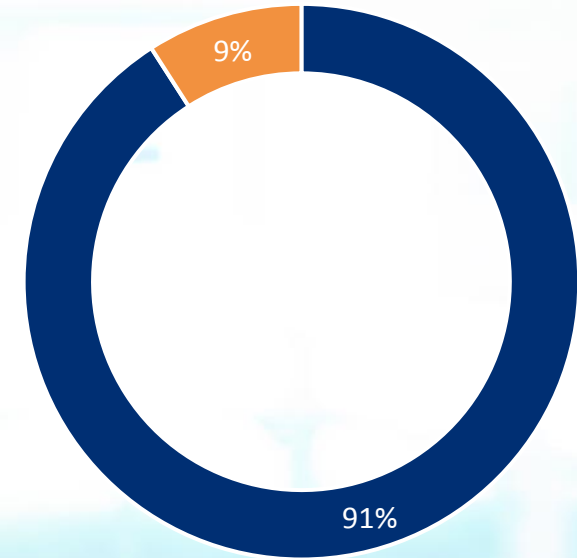

SQS implementation nominated for an SAP Quality Award.

8. The delivered solution meets our business expectations.	1	2	3	4	5	6
9. I am willing to act as a Gavdi reference.	Yes		No			

Satisfaction Rate

■ Satisfaction ■ Disatisfaction

Feedback – Overall, the feedback from SQS has been very positive in regards to the work carried out by Gavdi. Thomas was very complimentary about Gavdi’s ability to deploy the RDS template so quickly. He also remarked on the good relationship enjoyed by Gavdi and SQS. He did express concerns that there didn’t appear to be the same engagement as there was initially. Overall Thomas was happy to recommend Gavdi whilst also willing to act as a reference. This refrecibility can also be shared publicly.
